## Cycling Specific Technology and Services

- **Custom carbon fibre frames and accessories**
  - Hand made carbon composite frames
  - Specialist high performance components, light weight, aerodynamic
  - Design optimisation and consulting
- **Carbon frame damage assessment and repair**
  - Non destructive inspection methods, ultrasound, acoustic, x ray
  - Aerospace specification repair methods
- **Product evaluation and selection**
  - Advice and performance data on a large range of products
- **High Kinetic Energy Portable Trainer**
  - The only portable high kinetic energy trainer available
  - Simulates fast road riding, motor pacing, time trialling, track
  - Optimum muscle motor recruitment
- **Aerodynamic assessment**
  - Field based aero assessment
  - Windtunnel aero testing
  - Positioning and equipment optimisation
- **SRM power meter calibration, setup and service**
  - On bike SRM calibration
  - Setup, fault finding, battery replacement
- **SLAM single leg cycling**
  - Rehabilitation and conditioning tool
  - Simple, portable, effective
- **Custom cycling shoes**
  - Custom lasts
  - Light weight, aerodynamic, high performance
